Kindness

Eaglestar has received many international certifications, including China, Sri Lanka, Ghana, Tanzania, Indonesia, Nigeria, etc.

One Package Solution for Filling Station

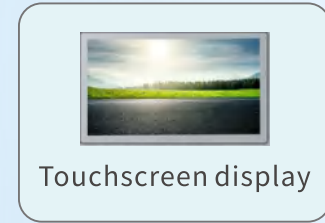

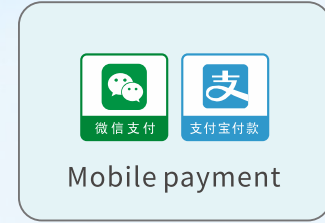

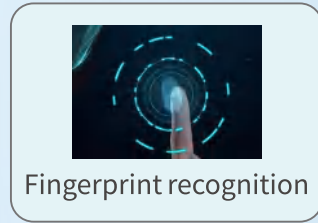

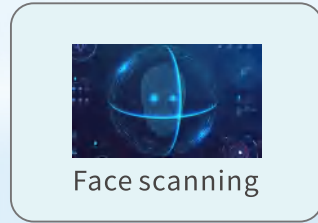

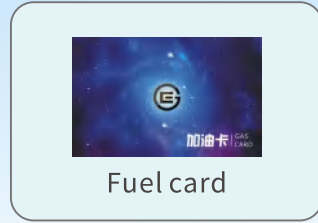

Basic models and standard features

- Standard duty : 50 liter per min. Optional 70 liter per min
- Vane pump, optional gear type pump
- 4-piston flow meter
- 7-7-5 LCD display, 8-8-6 optional
- Suction or submersible type
- 380V or 220V explosion proof motor
- Emergency button stop
- Non resettable electromagnetic totalizer
- Rs485 and current loop for POS communication

Optional features

- Built in printer for bill receipt
- Card reader for prepay petro card
- 15" colorful LED
- Optional self service system on LED
- Customized logo painting on front panel

Mini Station&Containerized Fuel Station

Key Features

- Integrated Design: Tank and dispenser combined, no underground setup needed.
- Flexible Capacity: 1,000L-60,000L with multiple compartments.
- Modular & Portable: Easy transport and fast installation.
- Cost-Efficient: Low startup cost for fuel businesses.
- Durable Build: Thick carbon steel with laser welding.
- Safe Operation: Automated controls with spill and fire protection.
- Global Leader: Over 50% market share in key regions.

Mobile station with Trailer

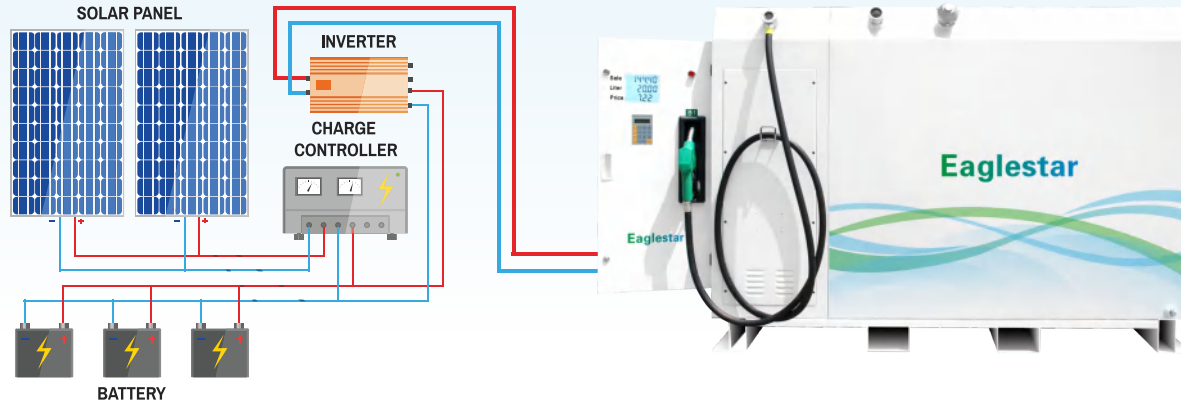

Dimension Size

Tank Capacity	Trailer Size (L*W)	Load-bearing range
1000L	1800*1250mm	1200kg
2000L	2250*1580mm	2500kg
3000L	2250*2000mm	4100kg
4000L	2250*2000mm	4100kg
5000L	2700*2100mm	4900kg
6000L	3050*2000mm	6400kg

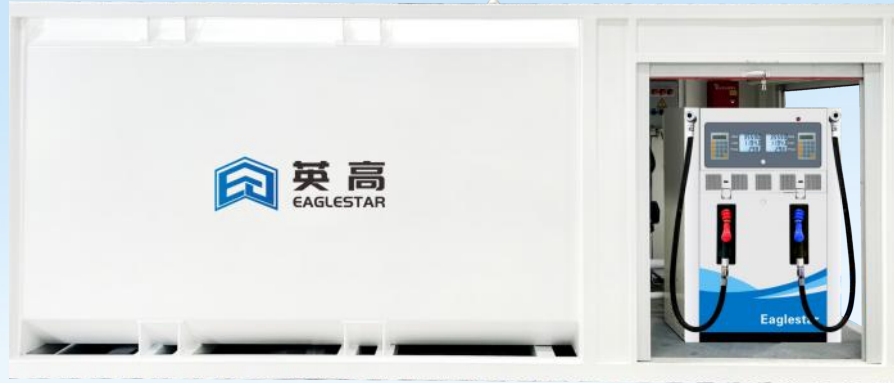

Trailer Highlights

- Q235 Steel Structure: Strong, durable, high load capacity
- Vacuum Tires : Wear-resistant, anti-burst
- Brake System: Reliable mechanical parking brake
- Stable Towing: Triangular design, stable connection
- Steady Parking: 4 mechanical legs for steady parking
- Night Visibility: Tail lights & 7-pin socket for night safety

Station with Solar System

Container Filling Station

10,000 L to 60,000 L

Designed as modular structure, for filling vehicles such as public transportation, taxis, trucks, trailers, etc.

Basement of skid

- LPG storage tank with different capacities: 5m³, 10m³, 15m³, 20m³, 30m³ etc. (Custom sizes available)
- LPG filling pump with motor
- LPG dispensing unit: LPG dispenser
- LPG control panel
- Pipeline & other accessories: valves, manometers, flanges, safety valve, level instrument & filter etc.
- Customized LOGO and painting on front panel

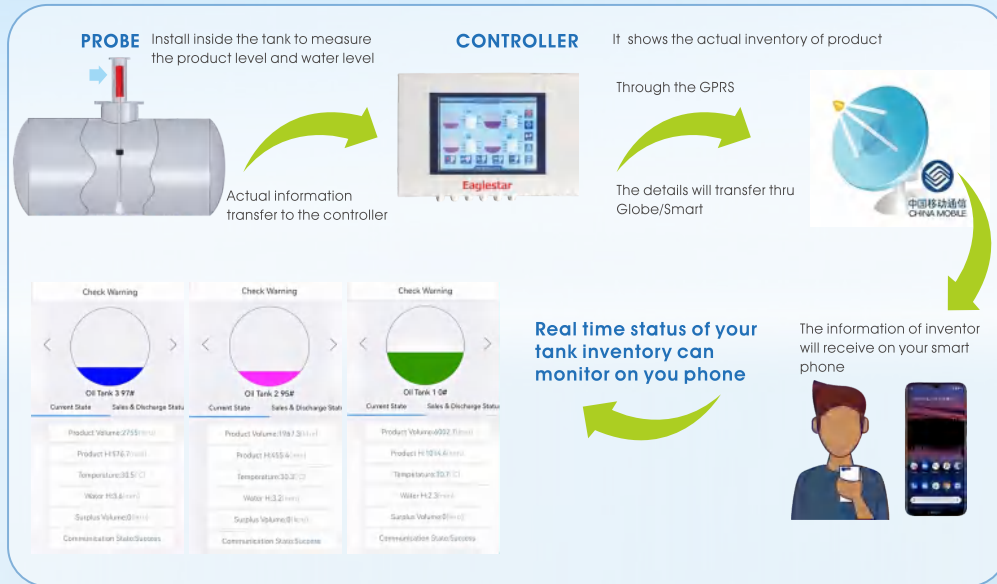

Our LPG Skid Filling Stations (Dispenser Type) are designed as modular structure, for filling vehicles such as public transportation, taxis, trucks, trailers, etc.

Auto Tank Gauge System

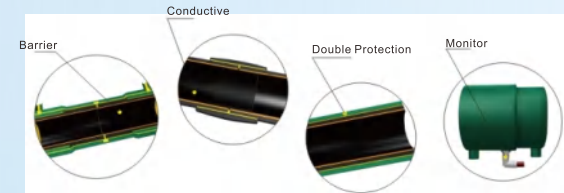

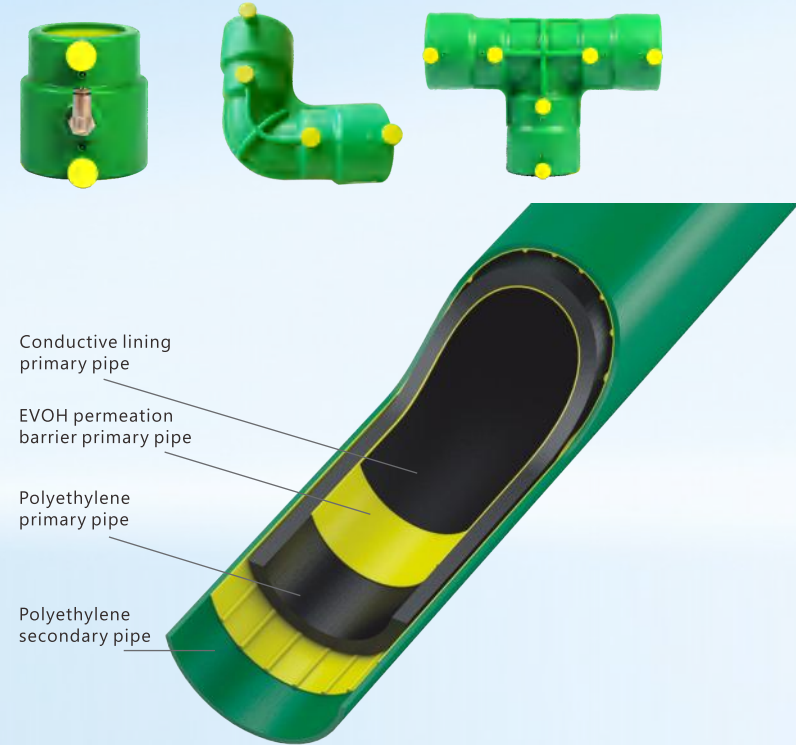

Cloud Management System

HDPE Pipeline

Key Feature

- Super resistance to all kinds of solvent and hydrocarbon
- Higher fuel permeation barrier characteristics
- Excellent resistance to curve and crack
- Higher strength than Nylon
- Long-term thermal stability and resistance to aging
- Lower temperature to -40°C

...e range, the burst pressure of HDPE flexible pipeline which
